

## Instructions for Caregivers

Making a cup of tea is one activity your learner has been working on in Michif class. They are bringing home a sheet just like this one and we'd like them to practice making a cup of tea for someone at home. Please play along even if you don't drink tea, OK?! There is an audio file that is available for you to listen to here: ( Upload mp3 to Youtube or other free and easily accessible sight acceptable to your administration and put the link here.) We would like to encourage you to listen to the recording and familiarize yourself with it. Then go over the words and the instructions on the worksheet with your learner. Listening to the recording together is also a great idea. Finally, you can play the recording from about 00:01:55 and you and your learner can practice reading the script together in Michif.

A bonus would be if you feel comfortable enough with reading and saying the Michif, you can tell the learner the steps and have them make tea for you and vice versa if your learner feels confident to do so.

Most of all have fun!

(Please sign anywhere your learners worksheet once done and have them bring it back to school.)
