

## Family Language

The Guided Oral Input Model Lesson is shorter than the allotted time in the lesson plan. This gives you time to transition to and from this section and ALSO to add more information to your chart as you using the script below and supported by the audio file. Please note DO NOT add more than two more vocabulary words or you will overload your learners working memory!

|                        |                           |
|------------------------|---------------------------|
| Aweena?                | Who                       |
